Seville, a gorgeous beamer theme

That was the title and this is the subtitle

Conference Presentation 2023

Seville looks

Seville is a beamer theme inspired by Matthias Vogelgesang's beautiful Metropolis theme.

This theme uses the Font Awesome 5 icons .

The logo is borrowed from Graficatessen.

Colors are taken from the Solarized palette .

Text can be ***alerted***, **bold**, *emphasized*, or `monospaced`.

Optionally, this theme can also use the Academicons , the Fira Sans font by Mozilla , or the Noto Sans font by Google . If so, you must compile with LuaLaTeXor XeLaTeX.

Beamer blocks[1]

Block

This is the look of a normal beamer block.

Alert!

This is an alerted block.

Example

This is how an example block looks like with this theme.

[1] There are also predefined math block environments: *definition*, *example*, *theorem*, *proof*, *corollary*, *lemma*, *fact*, *proposition*, and *remark*.

Math symbols

Math symbols look as follows:

$$F(x) = \int_{-\infty}^{x} \frac{1}{\sigma\sqrt{2\pi}} e^{-\frac{1}{2}\left(\frac{x-\mu}{\sigma}\right)^2},$$

$$f(x) = \sum_{n=0}^{\infty} f'(a)\frac{(x-a)^n}{n!},$$

$$A = \begin{pmatrix} a_{11} & \cdots & a_{1p} \\ \vdots & \ddots & \vdots \\ a_{n1} & \cdots & a_{np} \end{pmatrix},$$

$$\bigotimes_{i=1}^{n} A_i = A_1 \otimes \cdots \otimes A_n,$$

$$A \cap \bigcup_{n=0}^{\infty} B_i = \bigcup_{n=0}^{\infty} (A \cap B_i),$$

$$A \cup \bigcap_{n=0}^{\infty} B_i = \bigcap_{n=0}^{\infty} (A \cup B_i),$$

$$X \otimes (Y \oplus Z) = X \otimes Y \oplus X \otimes Z,$$

$$\operatorname{Hom}\left(\bigoplus_{i \in I} X_i, Y\right) = \prod_{i \in I} \operatorname{Hom}(X_i, Y).$$

Lists

We have lists, with numbers or symbols, and three indentation levels.

1. Carrots.
    a. Orange.
        i. Long.
        ii. Short.
    b. Purple.
2. Onions.
3. Lettuce.

- Carrots.
    - Orange.
        - Long.
        - Short.
    - Purple.
- Onions.
- Lettuce.

Citations

Citations like [Knuth, 1973] contain links to the reference list. Click on it!

It also works with several papers in the same citation command, like [Dirac, 1981, Knuth, 2016].

You can also credit theorems with citations.

Theorem ([Einstein, 1905])

This theorem was proved by Einstein. Click on the red citation!
