# Seville looks

Seville is a beamer theme inspired by Matthias Vogelgesang's beautiful Metropolis theme.

This theme uses the Fira Sans font by Mozilla , the Font Awesome 5 icons , and the Academicons .

Colors are taken from the Solarized palette .

Text can be **alerted**, **bold**, or *emphasized*.

Presentations using this theme must be compiled with Lua $\text{\LaTeX}$ .

# Beamer blocks<sup>1</sup>

## **Block**

This is the look of a normal beamer block.

## **Alert!**

This is an alerted block.

## **Example**

This is how an example block looks like with this theme.

---

<sup>1</sup>There are also predefined math block environments: *definition*, *example*, *theorem*, *proof*, *corollary*, *lemma*, *fact*, *proposition*, and *remark*.

# Lists

We have lists, with numbers or symbols, and three indentation levels.

1. Carrots.

a. Orange.

i. Long.

ii. Short.

b. Purple.

2. Onions.

3. Lettuce.

- Carrots.

- Orange.

- Long.

- Short.

- Purple.

- Onions.

- Lettuce.

# Citations

Citations like D. E. Knuth 1973 contain links to the reference list. Click on it!

You can also credit theorems with citations.

***Theorem (Einstein 1905)***

This theorem was proved by Einstein. Click on the red citation too!
